SUMMARY

Final-year B.Tech graduate in Artificial Intelligence and Data Science seeking a Python Developer role. Experienced in building scalable Python-based web applications, RESTful APIs, and database-driven systems using Flask, OpenCV, and MySQL. Skilled in backend architecture, data pipelines, and deploying AI/ML solutions with PostgreSQL and MongoDB. Strong problem-solving skills with focus on clean, efficient software.

EDUCATION

B.Tech - Artificial Intelligence & Data Science | Oct 2022 - May 2026

J.N.N Institute of Engineering | CGPA: 8.17 / 10

Intermediate (MPC) | Jun 2020 - Mar 2022

Vignan College | CGPA: 6.5 / 10

SSC (10th Grade) | Jun 2019 - Mar 2020

Z.P.P. High School | GPA: 9.2 / 10

SKILLS

Programming Languages: Python, Java, JavaScript

Backend: Flask, RESTful APIs, REST API Development, PostgreSQL, MongoDB

AI / ML Libraries: OpenCV, MediaPipe, NumPy, Pandas

Database: MySQL, PostgreSQL, MongoDB

Version Control: Git, GitHub

Frontend: HTML5, CSS3, Figma, Canva

Visualization Tools: Power BI, MS Excel

WORK EXPERIENCE

AI Developer Intern | Edunet Foundation (IBM SKILLS BUILD) | Jul 2024 - Aug 2024

- Developed an AI-powered event assistance chatbot using Python, improving student access to college event details and reducing manual queries by 40%.
- Built interactive dashboards in Power BI to analyze agriculture datasets, enabling data-driven business decisions.
- Deployed application components on IBM Cloud and collaborated with cross-functional teams in an agile environment.

PROJECTS

AI Attendance Tracker | Python, Flask, OpenCV, MySQL | Sep 2025 - Oct 2025

- Developed a web-based face recognition attendance system using Python, Flask, and OpenCV with real-time webcam input, achieving 85% recognition accuracy.
- Integrated MySQL and PostgreSQL databases for storing facial feature data with a modular, scalable backend architecture.
- Automated the full attendance pipeline, eliminating manual tracking entirely.

Sign Language Translator | Python, OpenCV, MediaPipe, TTS | Dec 2024 - Jan 2025

- Built a real-time sign language recognition system using Python, OpenCV, and MediaPipe to detect hand gestures via live webcam.
- Integrated a text-to-speech pipeline to convert recognized gestures into audio output.
- Designed a modular classification pipeline with clean separation of layers.

PUBLICATIONS

- A Synergistic Approach to Real-Time Text Translation and Speech Synthesis - Research on integrating machine

translation with text-to-speech systems for multilingual accessibility.
